

MAKE A SAND TIMER

You will need

- Two small plastic bottles
- Dry sand
- Masking tape
- A digital timer or smartphone

What you do

- Screw the lid with the hole onto the bottle.
- Pour sand into the other bottle then tape it to the lid with the hole in to join the two bottles together, as shown.
- Use a timer to measure how long it takes for the sand to fall into the other bottle. Adjust the amount of sand until it takes the exact amount of time you want.
