HOW STUFF WORKS – TOILETS

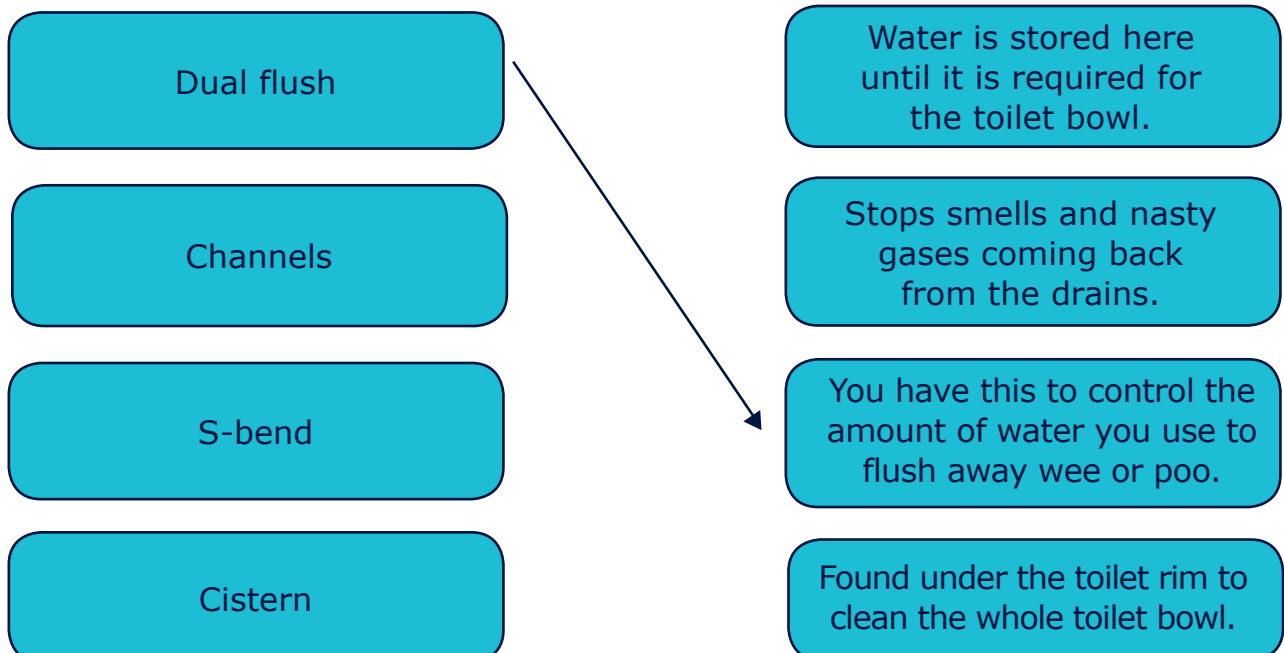

Q1. Why are modern toilets better than old-fashioned ones?

Q2. Apart from the amount of water they use, what is different about a modern-day toilet compared to an older one?

Q3. How are the two flushes different in a dual flush toilet?

Q4. What is the job of the inlet valve?

Q5. On the left are some main ideas about toilets. Draw a line to the detail on the right that goes with each of them. One has been done for you.

Q6. Put a T or an F in the boxes next to each statement to say whether the information is true or false.

- ☐ Older toilets have a dual flush to control the amount of water used.
- ☐ 2,000,000,000 litres of water is used to flush toilets in the UK every month.
- ☐ Modern toilets use half the amount of water that old-fashioned ones use.
- ☐ After the toilet has been flushed, the waste flows down into the drains.

Q7. Can you find the missing letters in these toilet-related words?

T _ i _ _ t p _ _ er

_ a _ _ c o _ _

D _ _ l _ _ u s _

_ i s _ e _ _
